

> SWEPT SALON

DDI came into the project at execution stage to manufacture and install the fittings. We successfully answered the client's brief for clean, quality finishes and textures that conveyed an easy and relaxed feel. DDI worked cohesively with a number of contractors on site to achieve the beautiful pure space that Swept Salon is today. The use and combination of fixtures has translated into a space that is both pristine and inviting. The clean white basins and chairs merge beautifully with warm wooden panels and cabinetry to create a charming environment for clients that have come to call Swept their own private sanctuary of rest and relaxation.
